

Okeowo Emmanuel Moyinoluwa

Software Engineer

Lagos, Nigeria • emmanuelokeowo14@gmail.com • github.com/filosofer01 • linkedin.com/in/okeowo-emmanuel

SUMMARY

Software engineer and Computer Science undergraduate who builds full-stack web applications end to end — from data models and APIs to the interface. Comfortable across the stack and actively deepening my work in AI, cloud, and modern web engineering. I care about software that is fast, reliable, and honest about its tradeoffs.

EXPERIENCE

IT Intern, Cybersecurity — New Horizons

2026 – Present • Nigeria

- Work alongside engineers on security fundamentals, network defense, and day-to-day IT operations.
- Building hands-on experience in threat awareness and how real systems are attacked and defended.

SELECTED PROJECTS

TakerBank — Digital banking web interface

HTML · CSS · JavaScript · GitHub Pages · Team of 10

- Built and shipped a seven-page banking interface (accounts, loans, cards, mobile banking, support, FAQ, login) with a 10-person team; focused on front-end structure and page layout.

github.com/filosofer01/TakerBank • filosofer01.github.io/TakerBank

Big Data Analytics with MongoDB & Apache Spark

Python · PySpark · MongoDB · Docker · Kali Linux

- Generated 5,000 synthetic tweet records and ran an end-to-end pipeline — stored in MongoDB, loaded into Spark via the MongoDB Spark Connector, cleaned in PySpark, and queried for top users, hashtags, and high-engagement content.

SummitGuard — Insurance company website

HTML · CSS · JavaScript · Django · Netlify

- Built a multi-page business site (six service lines, careers, leadership, contact) and deployed it simultaneously to GitHub Pages and Netlify.

EDUCATION

B.Sc. Computer and Information Science — Lead City University

2023 – 2027 (Expected) • Ibadan, Nigeria • Currently 300 Level

SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS

Frameworks & Libraries: React, Next.js, Tailwind CSS, Apache Spark / PySpark

Tools & Platforms: Git & GitHub, MongoDB, Linux, Docker, Vercel, Netlify, GitHub Pages, VS Code

Focus Areas: Full-stack web development, AI-assisted development & LLM workflows, prompt engineering, data analysis, cybersecurity fundamentals
